

NEVADA NASA EPSCoR

REQUEST FOR PROPOSALS: Research Infrastructure Development Seed Grant

Release Date: April 16, 2018

Announcement for Faculty from:
University of Nevada, Las Vegas; University of Nevada, Reno; Nevada State College; College of Southern Nevada; Great Basin College; Truckee Meadows Community College; Western Nevada College, Desert Research Institute

Proposal Deadline: 5:00 pm PT, Monday, June 4, 2018
Webinar about this solicitation will be held May 1, 2018 at 12 noon PT. Use this webex link to: [JOIN THE MEETING](#)

I. INTRODUCTION

The goal of NASA's Established Program to Stimulate Competitive Research (EPSCoR) is to develop academic research enterprises that are long term, self-sustaining and nationally competitive for non-EPSCoR dollars. The following are the specific objectives of the NASA EPSCoR program in Nevada:

- Improve the capabilities of Nevada faculty/researchers to gain support from sources outside the NASA EPSCoR program that are most relevant to NASA research and missions as defined by the [NASA 2018 Strategic Plan](#), one or more of the four [Mission Directorates](#) and/or one or more of the ten NASA centers. (The [NASA Chief Technologist or the Chief Technologists at the NASA Centers](#) are also good sources of information on research programs.)
- Contribute to the overall research infrastructure, science and technology capabilities, higher education, and/or economic development of Nevada;
- Develop partnerships between NV research facilities, NASA Centers, and industry;
- Work in close coordination with the NASA Space Grant program, as applicable, to improve the environment for science, mathematics, engineering, and technology education in Nevada.

The programmatic focus is to further engage and utilize Nevada's unique resources and talent for enhancing scientific discovery and/or developing new technologies to address NASA's goals. The request for seed grant funds may be based on outcomes from prior workshops/meetings with NASA Personnel; however, these funds should not augment existing funded research projects. Research Infrastructure Development (RID) activities should target unique activities that increase Nevada's competitiveness.

The seed grant proposals must include a collaboration of at least two NSHE institutions, produce a proposal to NASA or relevant program, and be designed for activities that accomplish one or more of the following:

- Initiate inter-or multi-disciplinary activities;
- Create critical mass or expertise on topics of strategic interest to NASA and Nevada; and/or
- Engage NASA scientists from one or more NASA Centers.

Note: There is no requirement that funds be used to support student participation, although it is allowable. Any student support should be fully explained in the project description. These funds should not augment existing funded research projects.

II. PROPOSAL INFORMATION AND INSTRUCTIONS

A. Eligibility

Faculty at NSHE institutions, particularly junior faculty, women, and members of other underrepresented populations are encouraged to apply.

B. Award: Funding Information

Depending on available funds, it is anticipated that at least 3 projects will be awarded. Project total should not exceed \$50,000 (\$25K federal/\$25K state match). Unrecovered F&A must be included as part of the \$25K state match. State funds will be provided by State Special Projects match. Each submitted proposal must include budgets signed by the Sponsored Projects Office or Business Managers from collaborating campuses with the amount of the collaborators total budget listed under 1.A. Subcontracts on the NSHE budget form.

Awards will be made to the lead PI and then their institution will sub-award funds to all collaborating NSHE institutions. It is expected that each institution will receive both Federal and State matching funds close to the 1:1 match requirement.

C. Deadline:

The deadline for application submission is 5:00 pm Pacific Time, on Monday, June 4th, 2018. Only applications for which all materials have been received will be reviewed. Incomplete applications will NOT be reviewed.

D. Award Obligations

Award recipients are required to prepare a progress and final report following NASA EPSCoR guidelines. Detailed reporting requirements will be provided with award notification. Note: You will be required to prepare a progress report in April, a final report at the end of the project, provide demographic data about participants and prepare a project highlight for inclusion in an annual NASA EPSCoR Congressional report.

Award recipients are also expected to attend and make a presentation at the annual NV NASA EPSCoR and Space Grant Meeting. Travel for this meeting should be included in your budget.

E. Proposal Guidelines

Proposals must be typed, single-spaced, and use an **Arial/Calibri/Times Roman or similar easy-to-read 12 pt.** font with numbered pages and 1 inch margins. The proposals should be written such that faculty from a diverse array of scientific disciplines would be able to understand the proposal goals, importance of the research and how the anticipated outcomes will benefit NASA, NV and NSHE. Review panel members may not all have specific expertise within the topic area of each proposal submitted.

1. Cover Page (form provided as “paperclip” attachment to this solicitation)

- Signature of Applicant
- Signature of Office of Sponsored Projects/Programs

2. Project Description (limited to 5 pages)

Provide a concise description of the proposed research or research-building activities, including the following:

- a. Summary of Project (500 words);
- b. Project goals, objectives and methods (tasks);
- c. Anticipated project products, i.e., publications, proposals, hardware, software, websites, etc.
- d. List of collaborators and expertise they will contribute (including any NASA scientists); *Any NASA collaborators must provide letters of support and specifically state the contribution they will make. (Note: if applicable to the proposal, letters of support/collaboration should be included. Letters must be recent and dated within 45 days prior to the solicitation due date);
- e. Description of how the effort will contribute to the [NSHE Science and Technology Plan 2015](#) and/or the [State of Nevada's Economic Development Plan](#) respectively; and
- f. Description of how the effort will align with the either or both the research priorities provided by the National NASA EPSCoR Program Manager (attached) and the [NASA Strategic Plan 2018](#).

3. Budget and Budget Justification

There is a 1:1 state match requirement. Faculty, students and NSHE personnel may request funds for salary, travel, materials and supplies and other resources necessary to build research infrastructure. However, where appropriate, we encourage you to use RID workshop/travel funds depending on availability for travel and workshops; the solicitation is located at [Funding Opportunities](#). Travel costs are allowable to support travel for visiting external scientists. Funds cannot be used for equipment or construction/remodeling of facilities, foreign travel, or for civil-service personnel travel.

The budget must be completed using the NSHE excel form attached. Dollar amounts proposed with no explanation are not allowed. Direct labor costs should be subdivided and listed by individual and/or titles or disciplines with hours, hourly rates, and total amounts of each. Proposed travel should include the number of trips, destination, duration, etc. The budget must include applicable F&A (indirect costs) for your institution. All budgets must be signed by the applicant institution's Business Office/Office of Sponsored Projects. *If selected for funding, final budgets will be reviewed and if necessary the PI may be asked to consider a funding reduction based on the availability of funds.*

4. NASA Funding History (limited to one page)

Provide a detailed list of previous & current NASA funded projects for the lead PI. Include the title of the project, the project period, the funded amount, and project outcomes.

5. References/Citations (no page limit)

6. Biographical Sketch or Curriculum Vitae

Limited to two pages per person, including the PI, Co-PI(s) and student(s) involved who have a major role in the project.

7. Letters of collaboration from NASA Centers or industry (if applicable)

Any NASA collaborators must provide letters of support and specifically state the contribution they will make. Letters must be recent and dated within 45 days prior to the solicitation due date.

III. Submission Guidelines:

Proposals will be accepted until **5:00 pm PT, June 4, 2018**. Proposals must be submitted by the institution Sponsored Programs Office or appropriate Authorized Official. Upload your proposal using the online form as **one PDF document** (following Proposal Guidelines 1-7) at: <https://nasa.epscorspo.nevada.edu/funding/2018-rid-seed-grant/>

The email subject line and the pdf application document should be specific to each applicant and read: **PI Last Name_First Name_NASA RID**. Submissions that are incomplete will not be reviewed and no late submissions will be accepted.

All required submission forms are “paperclip” attachments to this solicitation. You must download and open through Adobe Acrobat to be able to see them.

IV. PROPOSAL REVIEW PROCESS AND EVALUATION CRITERIA

The screening and selection process will include an internal NSHE faculty review panel that will focus on the following criteria:

- Potential to result in a competitive NASA and/or other agency proposal, i.e., detailed information on potential solicitations for which a competitive proposal will be prepared as a result of this project;
- Alignment with NSHE Science and Technology, Nevada’s Economic Development and NASA Strategic Plan goals;
- Clear benefits to NV research infrastructure development;
- The project is multi- or inter-disciplinary and includes at least two NSHE institutions;
- Quality of the research proposal as evidenced by:
 - a. Well defined research objectives
 - b. Clearly defined methods that adequately address the objectives
 - c. Demonstrated ability of faculty to conduct the anticipated
- NASA support and/or collaboration, if applicable;
- Budget and budget justification as appropriate for scope.
- Overall quality of the proposal, which should be written so that individuals from almost any STEM background will be able to understand the importance/objectives and project methods.

V. CONTACT INFORMATION
