

Theo is an MS student in the Natural Resources & Environmental Science program at the University of Nevada, Reno. He completed his B.S. in Environmental Science at Queens of Charlotte in North Carolina. His research focuses on using TLS and UAV data to assess and monitor change in Sierra Nevada forests. His research project is automating stem mapping of trees from TLS scans. His future academic goal is to continue his research at UNR for a PhD. Afterwards he aspires to work in the remote sensing industry, building off his experience with point clouds.
