

Ceonie Washington
Undergrad Research Assistant

Bio:

Ceonie is currently pursuing a degree in Biology at Nevada State College. After receiving her bachelor's degree, she plans to attend a Ph.D. program. She has gained under graduated research through the Undergraduate Research Opportunity Program (UROP) and IDeA Network of Biomedical Research Excellence (INBRE). She is currently conducting research under the guidance of Dr. Erick Bandala for assessing the effect of traffic-related pollutants in stormwater contamination. In this project, the goal is to discover more about the presence of traffic-related contaminants, and their potential effects on the proper assessment and management of water quality or measurements to adapt to climate change scenarios in the region. She has even been able to present her findings from this project at the 2021 UCRW Virtual Undergraduate Research & Creative Works.
