

# NEVADA NASA PROGRAMS SPEAKER SERIES

## PATHWAY TO A STEM CAREER AT NASA

---

**BY: TODD JACKSON, JR., ELECTRONICS ENGINEER, NASA**

Todd Jackson, Jr. is an electronics engineer with the National Aeronautics and Space Administration (NASA) in Los Angeles County, CA where he serves as a Range Systems Engineer. Mr. Jackson's interest in aviation started at an early age. A military brat, Mr. Jackson enjoyed watching aircraft pass by on the flight line near his father's mechanics' shop. He pursued a degree in Aerospace Engineering at the University of Arizona, graduating in 2008.

Mr. Jackson will talk about the path of his career, obstacles he overcame and address questions from students (and faculty) about STEM education and how to pursue your STEM career dreams.
