

My name is Parsa Azaei, I am a junior majoring in Biochemistry. At the moment, I plan on graduating Spring 2024. Along with this, I am currently working towards my National Registry Emergency Medical Technician License (NREMT), so that I can volunteer as a firefighter for Clark County. I aspire to be a doctor and I am planning on applying to medical school in the 2023 Summer Cycle. During this school year, I will be working on synthesizing a phosphorothioic acid flame retardant that can hopefully be used for manned missions to Mars.
