

My name is Anna Desorcy, and I'm currently completing my senior year, set to graduate this May with a Bachelor's Degree in Computer Science and Engineering from the University of Nevada, Reno. A highlight of my academic journey includes being selected for an internship at the Johnson Space Center during the summer of 2023, an opportunity I've gratefully accepted for this coming summer as well. My main motivation for becoming a computer scientist is to contribute to the space industry and help drive forward our exploration of the galaxy. Originally from Southern California, I relocated to Reno, Nevada in the summer of 2020. Beyond my studies, I love being outdoors, specifically hikes, fishing trips, and camping. I'm also an avid learner, constantly seeking new knowledge through books, podcasts, and online lectures.
